TRADE ADVISOR · MARKET INTELLIGENCE REPORT

Sulphur to South Korea

Delivered cost from every source country

HS 2503.00 · delivered Busan → client · 100 t and 1,000 t lots · 30 October 2026

MOST PROFITABLE SOURCE

China

$40,918 profit on 1,000 t
$859/t delivered

BEST CIS SOURCE

Uzbekistan

$913/t delivered
1,000 t lot

COUNTRIES OPEN NOW

10 of 22

others banned, sanctioned or disrupted (Oct 2026)

Prepared for a Kazakhstan-national trader resident in South Korea. Estimates built from October 2026 benchmarks, not supplier quotes. Verify with a licensed Korean customs broker, freight forwarder and supplier before committing money.

01 · EXECUTIVE SUMMARY

Where to buy, and what it costs delivered

Every realistic sulphur source was costed the same way: purchase price at origin, export fees and bagging, freight to Busan in 20ft containers (25 t each), insurance, Korean duty, port and hazmat delivery, financing and an FX buffer.

Cheapest legal source today: China at **$859/t** delivered for 1,000 t (5% margin at $900/t).

Best CIS source: Uzbekistan at **$913/t** (-1% margin).

Top 3 by profit (1,000 t): 1. China $40,918 · 2. Japan $19,486 · 3. Taiwan $11,130. Details in section 03.

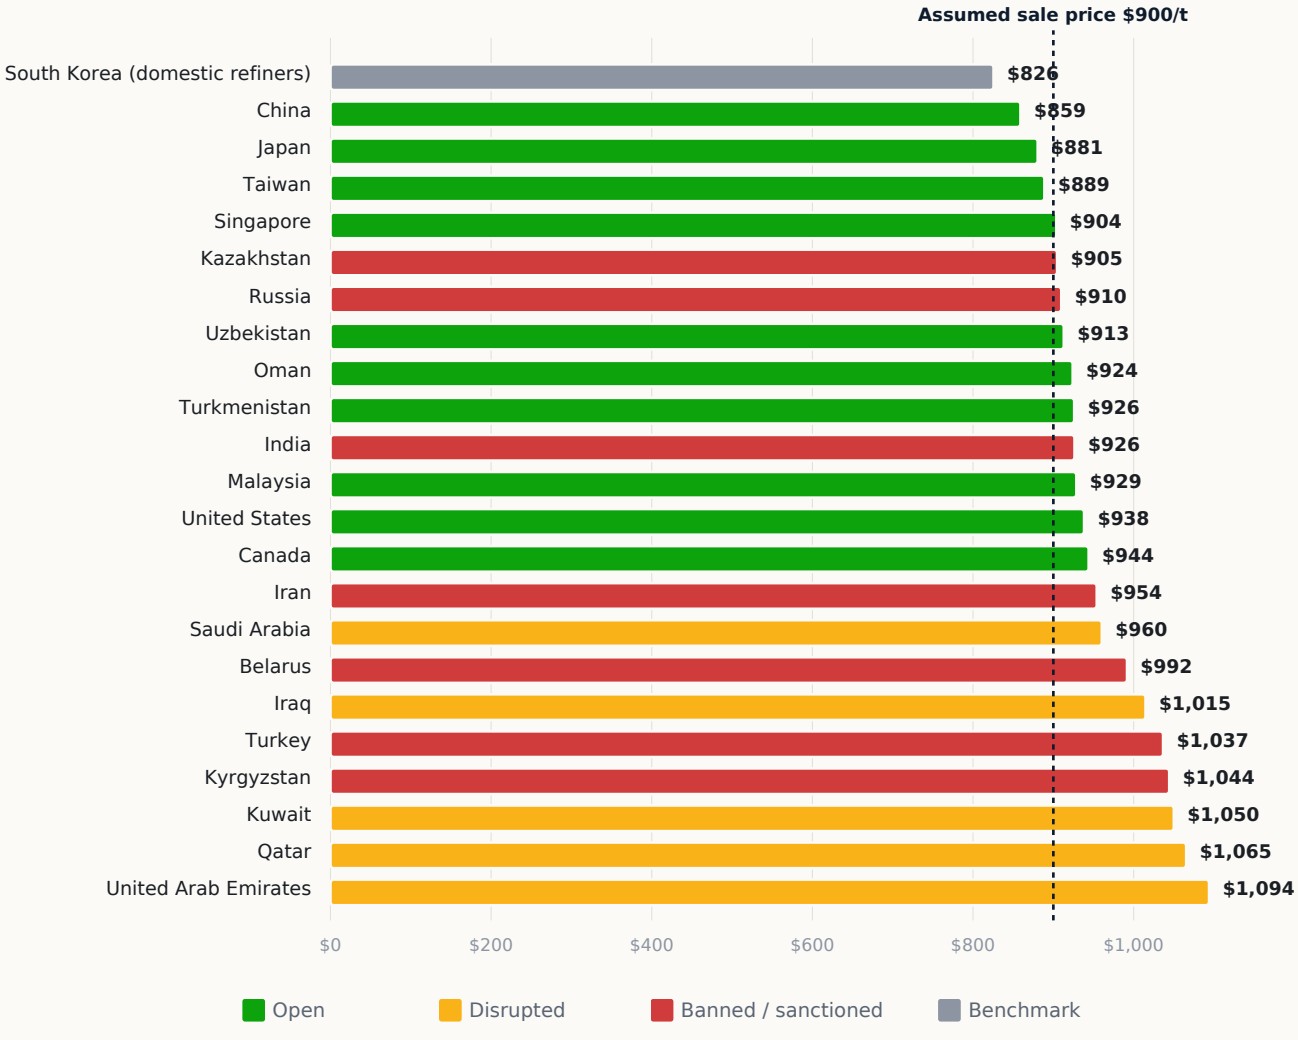

Korean domestic benchmark (South Korea (domestic refiners)): $826/t, which is what your clients can already get locally.

Only **10 of 22** priced source countries are open; the rest are under export bans, sanctions or shipping disruption (marked in grey in the tables).

02 · COMPARISON

Delivered cost per tonne, 1,000 t lot

Bars to the left of the dashed line are below the assumed $900/t sale price; the gap is your gross profit per tonne.

03 · TOP 3

The three most profitable countries and routes

Ranked by gross profit on a 1,000 t lot sold at $900/t delivered, only among countries that can legally export today. ‘Per year’ assumes 1,000 t every month at the same prices.

1 China

Shandong refiners / Zhenjiang & Qingdao port stocks · sea (containers) · ~3 days to Busan

OPEN

ROUTE

1 Truck to Qingdao/Lianyungang/Shanghai
2 container to Busan

DELIVERED COST	PROFIT 100 T	PROFIT 1,000 T	PROFIT AT $950	PER YEAR
$859/t	**$2,394**	**$40,918**	**$90,918**	**$491,021**
1,000 t lot	at $900/t	4.5% margin at $900/t	1,000 t lot	1,000 t every month

Watch: No ban on elemental sulphur exports found (China bans SULPHURIC ACID exports May-Dec 2026). China is a large net importer, so exportable sulphur is scarce; domestic price fell sharply (ex-works RMB 5,400-5,550 on 22 Oct vs RMB 9,875 peak in June). Client must pay ≥ **$955/t** for a 10% margin. Data confidence: medium.

2 Japan

ENEOS / Idemitsu / Cosmo refineries · sea (containers) · ~3 days to Busan

OPEN

ROUTE

1 Japanese port (Osaka/Kobe/Moji)
2 container to Busan

DELIVERED COST	PROFIT 100 T	PROFIT 1,000 T	PROFIT AT $950	PER YEAR
$881/t	**$250**	**$19,486**	**$69,486**	**$233,832**
1,000 t lot	at $900/t	2.2% margin at $900/t	1,000 t lot	1,000 t every month

Watch: No restriction found. Japanese refiners are sulphur exporters (mainly to China) but no 2026 FOB Japan sulphur price was found (the $310-320/t 'FOB Japan/Korea' figure in CRU is SULPHURIC ACID, not sulphur). Client must pay ≥ **$978/t** for a 10% margin. Data confidence: low.

3 Taiwan

CPC (Kaohsiung/Dalin) / Formosa Petrochemical (Mailiao) · sea (containers) · ~4 days to Busan

OPEN

ROUTE

1 Kaohsiung/Taichung
2 container to Busan

DELIVERED COST	PROFIT 100 T	PROFIT 1,000 T	PROFIT AT $950	PER YEAR
$889/t	**−$586**	**$11,130**	**$61,130**	**$133,558**
1,000 t lot	at $900/t	1.2% margin at $900/t	1,000 t lot	1,000 t every month

Watch: No restriction found. CPC/Formosa refineries produce sulphur; CPC domestic quote up ~95% YTD by June 2026. No export FOB found. Client must pay ≥ **$988/t** for a 10% margin. Data confidence: low.

Best CIS option: Uzbekistan (Rail Mubarek -> Saryagash (KZ transit) -> Altynkol/Khorgos -> China rail -> Lianyungang -> Busan). Delivered $913/t: profit −$12,989 on 1,000 t at $900/t, $37,011 at $950/t. Client must pay ≥ $1,014/t for a 10% margin.

04 · RANKING

Every country, ranked by delivered cost

Cost per tonne delivered to the client in Korea, ex-VAT (VAT is recoverable). *Margin at 1,000 t and an assumed sale price of $900/t.

06 · COUNTRY PROFILES

Route, status, cost stack and profit per country

Cost stack per tonne at 1,000 t and profit at $900/t. The coloured edge shows the export status.

South Korea (domestic refiners)

BENCHMARK

BENCHMARK: Korea is a net sulphur exporter (S-Oil Onsan, SK Energy Ulsan, GS Caltex Yeosu, HD Hyundai Oilbank Daesan); South Korea was China's largest sulphur supplier Jan-Jul 2026 (516 kt). Korean clients can buy domestically, so any import must beat this price.

Route: Truck refinery -> client (no import) (truck, ~1 days)
Buy: $800/t ex-refinery/FCA ESTIMATE = export parity (CFR China granular $800-850 on 22 Oct minus ~$25-35 freight); actual domestic contract prices not published · **Freight:** $0/20ft · **Duty:** 0% (domestic (no duty))
Confidence: Low

Purchase	$800
Origin fees + bagging	$0
Freight	$0
Insurance	$0
Korean duty	$0
Busan + delivery	$20
Finance + FX	$6
Delivered	**$826**
Profit 100 t @$900	**$7,443**
Profit 1,000 t @$900	**$74,428**

China

OPEN

No ban on elemental sulphur exports found (China bans SULPHURIC ACID exports May-Dec 2026). China is a large net importer, so exportable sulphur is scarce; domestic price fell sharply (ex-works RMB 5,400-5,550 on 22 Oct vs RMB 9,875 peak in June).

Route: Truck to Qingdao/Lianyungang/Shanghai -> container to Busan (sea (containers), ~3 days)
Buy: $760/t FOB China ESTIMATE from ex-works RMB 5,475/t (22 Oct, incl. 13% VAT; ~$720 ex-VAT at ~6.72 CNY/USD) + port costs; 0% export VAT rebate · **Freight:** $500/20ft · **Duty:** 0% (Korea-China FTA and RCEP: 0%)
Confidence: Medium

Purchase	$775

Singapore

OPEN

Open, but small refinery output (Jurong Island); Singapore is mainly a TRADING hub - many offers are Middle East-origin re-sales. The certificate of origin will show the real (often Gulf) origin; do not treat it as Singapore-origin.

Route: Singapore -> container to Busan (sea (containers), ~7 days)
Buy: $800/t FOB Singapore ESTIMATE (ME spot $765 + regional trader premium); no published price · **Freight:** $700/20ft · **Duty:** 0% (Korea-Singapore FTA, ASEAN-Korea, RCEP: 0%)
Confidence: Low

Azerbaijan

OPEN

No ban or sanctions found, but only minor refinery by-product sulphur; no 2026 export offers found. Not a practical source.

Route: Rail Baku -> Poti/Batumi (Georgia) -> sea via Suez/Red Sea -> Busan (rail+sea (containers), ~50 days)
Buy: n/a · **Freight:** $5,000/20ft · **Duty:** 2% (none; not WTO member -> 2% basic assumed)
Confidence: Low

No price available

Indonesia

OPEN

No price available

Not a realistic source: Indonesia is a major NET IMPORTER (1.85 Mt H1 2026 for nickel HPAL/acid; CFR Indonesia $850-860 on 22 Oct). Listed for completeness.

Route: Jakarta/Surabaya -> container to Busan (sea (containers), ~10 days)
Buy: n/a · **Freight:** $800/20ft · **Duty:** 0% (Korea-Indonesia CEPA, ASEAN-Korea, RCEP: 0%)
Confidence: Medium

07 · METHOD & SOURCES

How the numbers were built

• Lot sizes 100 t, 1,000 t; 20ft containers of 25 t bagged sulphur.

• Origin: export documents, certificate of origin and broker $1,500 per shipment; bagging $15/t.

• Insurance 0.3% of (FOB + freight) × 110%. Korean duty on CIF: 0% WTO rate for WTO members and FTA partners; 2% basic rate for non-WTO origins (UZ, TM, AZ, BY, IR, IQ).

• Korea: Busan THC/D-O + hazmat-licensed truck $750 per container; customs broker + chemical confirmation $350 per shipment. VAT 10% recoverable, so excluded from cost.

• Financing 8%/yr on landed cost over transit + 30 days payment terms; FX buffer 1%.

• Purchase prices and freight are October 2026 benchmarks and estimates, not supplier quotes. Bulk vessel shipments (3,000 t+) are roughly $70/t cheaper than containers.

• Hazardous-material rules: sulphur is a Class 2 flammable solid in Korea (designated quantity 100 kg); deliver from port straight to a licensed client site. K-REACH coverage needed at ≥ 1 t/yr.
